

Engineering & Manufacturing

T Level

QUALIFICATION LEVEL	DURATION	INDUSTRY PLACEMENT	EQUIVALENT TO
Level 3	2 years	9+ weeks	3 A Levels

The Engineering & Manufacturing T Level family covers the full spectrum of the sector — from designing and developing new products to maintaining complex machinery and running production lines. All three pathways share the same rigorous technical core and a minimum 9-week industry placement, preparing students for skilled roles across engineering and manufacturing.

01	Design & Development	02	Maintenance, Installation & Repair	03	Engineering, Manufacturing & Construction
	Engineering design, CAD and product development.		Keeping systems running — from maintenance to repair.		Production, fabrication and process control.

SHARED CORE CURRICULUM

All three pathways cover these technical foundations

Working in Engineering & Manufacturing	How materials, conditions and context influence design processes and products; the structure of the sector and professional standards.
Essential Mathematics	Applied mathematics for engineering contexts including standard matrices, determinants and trigonometry.
Materials & Their Properties	Material processing techniques, their effects on quality and condition, materials management, and testing methods.
Business, Commercial & Financial Awareness	Commercial principles including priorities, markets, customer and client relationships, and resource allocation.

PATHWAY 01

01	Design & Development for Engineering & Manufacturing
	For anyone interested in a career in engineering design and product development.

OCCUPATIONAL SPECIALISMS

Choose at least one specialism

Mechanical Engineering

Electrical & Electronic
EngineeringControl & Instrumentation
Engineering

Structural Engineering

CAREER PATHWAYS**Roles you can progress into**

CAD Technician

Design Engineer

3D Printing Technician

Product Development Technician

PATHWAY 02**02****Maintenance, Installation & Repair**

For anyone interested in a career keeping engineering systems running.

OCCUPATIONAL SPECIALISMS**Choose at least one specialism**Maintenance Engineering:
MechanicalMaintenance Engineering:
Control & InstrumentationMaintenance Engineering:
MechatronicMaintenance, Installation &
Repair: Light & Electric VehiclesMaintenance Engineering:
Electrical & Electronic**CAREER PATHWAYS****Roles you can progress into**

Auto-Electrician

Mechanical Engineering
Technician

Telecoms Engineer

Engineering Maintenance
Technician

Motor Mechanic

Vehicle Body Repairer

Marine Engineering Technician

Roadside Assistance Technician

PATHWAY 03**03****Engineering, Manufacturing, Processing & Control**

For anyone interested in production, fabrication and process control.

OCCUPATIONAL SPECIALISMS**Choose at least one specialism**

Fitting & Assembly Technologies

Machining & Toolmaking
TechnologiesComposites Manufacturing
TechnologiesFabrication & Welding
Technologies**CAREER PATHWAYS****Roles you can progress into**

Aerospace Engineering Technician	Electrical Engineering Technician	Mechanical Engineering Technician
Blacksmith	Engineering Construction Craftworker	Non-Destructive Testing Technician
Boat Builder	Materials Technician	Welder

ENTRY REQUIREMENTS**What you'll need before you start**

T Levels are one of your options after finishing your GCSEs. Entry requirements are set by the individual school or college — check with your local T Level provider for the specific requirements for your chosen engineering pathway.

Find a provider

Visit tlevels.gov.uk/students/find to search for schools and colleges offering Engineering & Manufacturing T Levels near you.

Amazon Placement Programme

Your 9-week industry placement can be completed with Amazon. Talk to your placement coordinator or visit amazon.jobs/en/teams/apprentices
